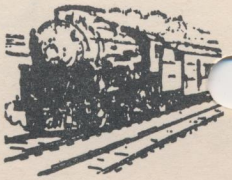
"HOBBIES IN GENERAL — MODEL RAILROADS IN PARTICULAR"

BRANCH LINE HOBBY SUPPLY

P. O. BOX 6319
MEMPHIS 11, TENNESSEE



Dear "S" Gager

WELCOME TO BRANCH LINE HOBBY SUPPLY

It is our sincere desire that this little catalog will bring as much pleasure to you, our friend and customer, as it has been for us to prepare it for you.

EVERY item shown in these pages is in stock and ready for immediate shipment.

From time to time new items will be announced and some of the older ones will be discontinued. You will be kept informed by our newsletter, "THE S GAGER", which is published every other month and mailed free of charge to every "S" gager who requests our catalog.

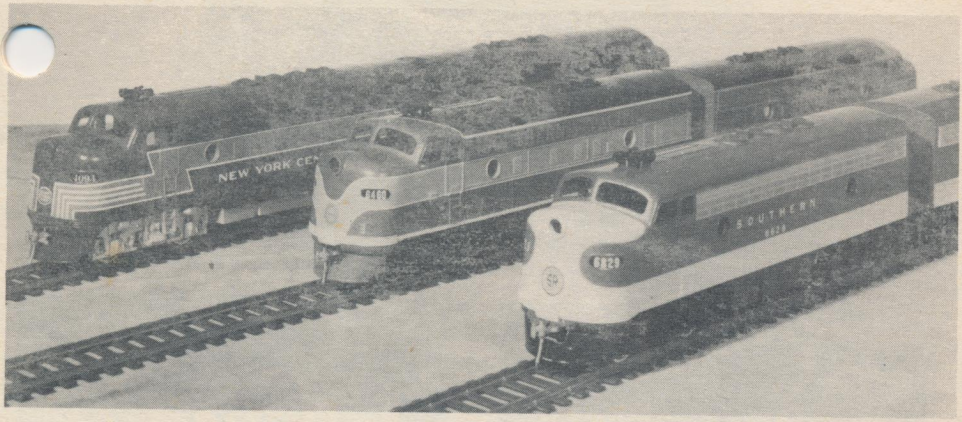
Our Catalog No. 1 is limited to "S" gauge equipment, but we carry a complete line of model railroad supplies, such as paints, scratch builder supplies of all types, electrical accessories necessary for the wiring and powering of your layout, scenic supplies and just about anything a MODEL RAILROADER could need or want. Use any model railroad magazine or catalog to order from us at any time. As new items are added to the model railroad field, we are also adding them to our stock.

We try to answer all inquiries and requests as soon as possible , so please feel free to call upon us at any time, WE ARE AT YOUR SERVICE.

Happy Railroadin',

Leonard Atkins

S GAUGE EMD F-9 DUAL ROAD DIESEL



These units are expertly copied from drawings of the F-9 Diesel built by General Motors. The trucks are of the 4-wheel type, fully sprung and equalized. Drive trucks have all four wheels driven. The body is one piece plastic molding. Diaphragms are MHP type. Floors for powered units are die cast zamac, floors for dummy units are plastic. A-units are illuminated. ENHORNING automatic or DEVORE couplers are furnished. Wheels with either scale or tinplate flanges are available. Motor is a PITTMAN DC-94.

Length each unit: 9.5" height: 2.75 width: 2"
Minimum recommended radius: 18"

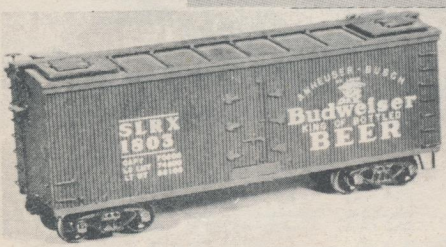
PRICES

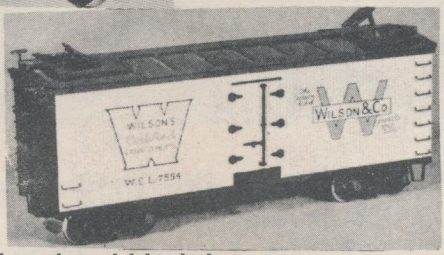
250AB	Two Unit Diesel, A powered, B dummy	$33.00
250Ap	A-Unit, powered	26.00
250At	A-Unit, dummy	13.50
250Bp	B-Unit, powered	24.00
250Bt	B-Unit, dummy	11.50

REX ENGINEERING COMPANY'S MOGUL SHOULD OCCUPY THIS SPACE, BUT IT'S NOT QUITE READY. YOU WILL RECEIVE A CATALOG SHEET AS SOON AS THEY ARE AVAILABLE.

KINSMAN SCALE MODELS

Old-Time, Private Owner (Billboard) Reefer kits.
Sides come pre-painted and lettered. Working ice hatches





Wilson's Meats — yellow sides with red and black lettering.

For Rex Scale or Hirail Trucks

Model No. 10 Tinplate

2.00 ea.

For American Flyer Truck & Coupler Sets

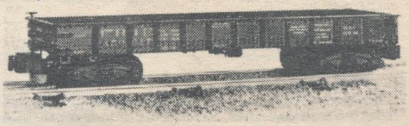
Built-in stake pockets and steps. Perfect prototype realism. One piece die cast body construction. Completely machined. All holes drilled, reamed and tapped. Kits include separate hand brake staff, hand brake wheel, air brake reservoir, valve and cylinder.

LOW SIDE GONDOLA CAR, CLASS GB

Model No. 7 Scale

2.50 ea.

For Rex Scale or Hirail Trucks



Model No. 8 Tinplate

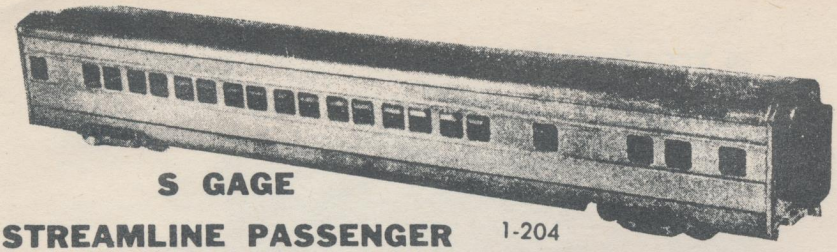
2.00 ea.

For American Flyer Truck & Coupler Sets

Made precisely to blueprints furnished by Mt. Vernon car shops and Southern Railway. Wherever there is a rivet or a rib on the prototype there is one on the Rex. Most versatile car kit in "S" gage.

The prototype lettering and numbering on these cars is constantly changing. The leading decal makers do a good job of trying to keep up with them. The paints and decals necessary to do this job are available at most hobby shops Using them properly is a pleasant and satisfying task. Most railroads paint the cars black with white lettering. Some roads however, including N.Y.C., L. & N., Grand Trunk and Pennsylvania, use boxcar red with white lettering. A few use gold or yellow lettering.

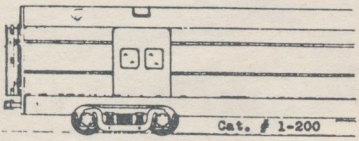
Rex nylon coupler and draft gear furnished on scale models.



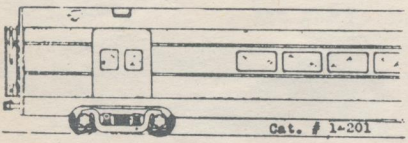
1-204

S GAGE
STREAMLINE PASSENGER CAR KITS

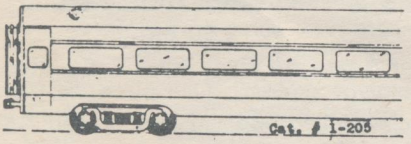
We feel that these "S" Gauge Streamline Passenger Car Kits are the finest available at the present time. The body of these cars is a one piece Aluminum Alloy extrusion with integral window strip and floor support grooves.



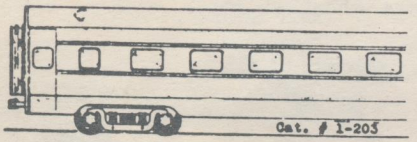
Cat. # 1-200



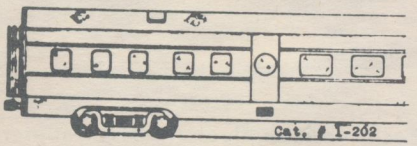
Cat. # 1-201



Cat. # 1-205



Cat. # 1-203

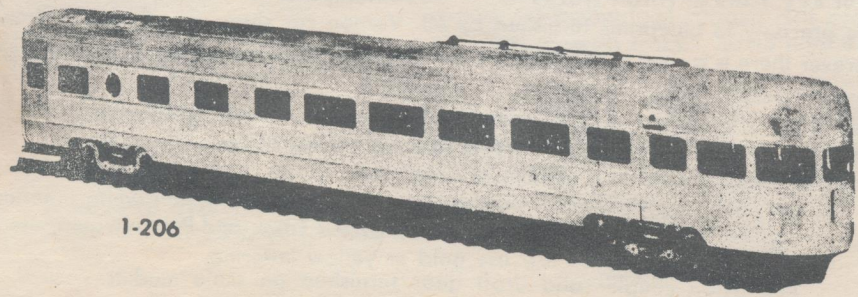


Cat. # 1-202

These kits include extruded magnesium streamline fairing strips with truck clearances punched out, high quality pressure cast ends, full working molded rubber diaphragms, (another Midgage original), wood floor, acetate window strips, all hardware and complete, easy-to-follow, exploded type instructions. Our standard 4 wheel, high speed Commonwealth Passenger Trucks are part of this kit. Cars are modeled after 80' prototype and are 15" long over the ends. 67' Baggage Cars are 12½" long. The rear end of the Observation-Lounge is a simple 3 piece assembly, and material is included for a radio antenna in this kit.

Seven types of cars are available, and while they are not modeled after the equipment of any specific railroad, with proper painting and lettering they will serve as a close replica of the smooth type streamline trains operated by many of the larger railroads. The Pennsylvania, New York Central, Great Northern, Illinois Central, Chicago and Northwestern and Union Pacific are some of the roads operating this type equipment.

For those who prefer to operate 3/16" scale equipment on Tinplate Track, we offer a line of four special short streamline cars equipped with tinplate trucks and couplers. They are all scale 67' (12½") long and will negotiate the shorter radius tinplate curves with ease. With the exception of trucks and bolsters, and a lesser number of windows, these "shorties" are identical in design with our full scale streamliners.



1-206

BRANCH LINE HOBBY SUPPLY has just obtained the line of Streamline Passenger Cars formerly owned by SYLVANIA MODELS. We hope to have these back in production in the near future. You will be notified of prices and availibility through "THE S GAGER".

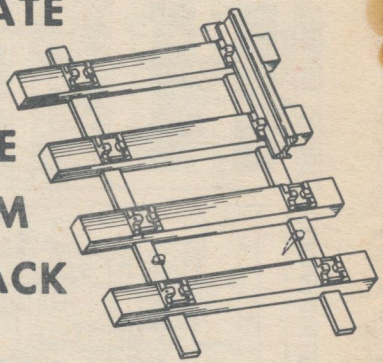
Palm-size SEE-THRU level — 2" x 2" x 1" — gives elevation in degrees and inch rise per foot on any given flat surface. Colored, brass-tipped pointer inside the molded case reads elevation on 1 side; inch rise per foot on other.

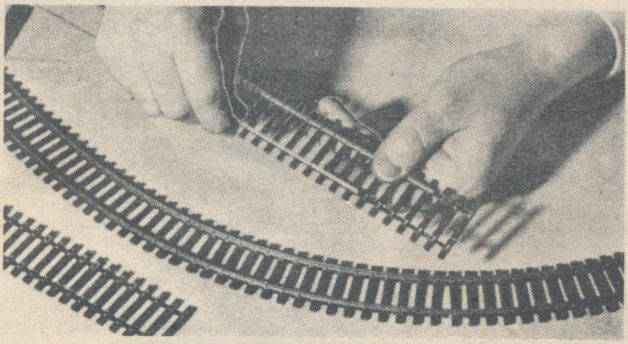
Miller S GAUGE PLASTIC

Patent pending

TIE STRIP

- FOR SCALE OR TINPLATE
- ASSEMBLES EASILY
- BENDS TO ANY CURVE
- DETAILED FOR REALISM
- QUIET--CUSHIONS TRACK





MILLER Plastic Tie Strip assembles easily with N.M.R.A. No. 126 S gauge scale rail (.125" high) to make the most realistic scale track you have ever seen. The material comes in six inch strips, and has tie plates and four spikes on each tie. It is assembled by sliding rails endwise underneath the spikes, which hold them firmly in perfect gauge. The assembled track is flexible and may be formed to a smooth curve of any desired radius without cutting. It is easily fastened to roadbed by cementing, or better, by placing spikes on web underneath the rail, as shown, at intervals of two to four inches.

Miller PLASTIC TIE STRIP Package of 10 ft. less rail **$2.25**
