

Cast plaster structure kits have part numbers without a suffix. Wood or styrene structure kits are identified with an "L" suffix on the part number signifying they are laser cut. Cast resin (urethane) structure kits are identified with a "R" suffix. Most detail parts are white metal castings. A few parts are plastic castings and they are identified with the letter "P" following the stock number.

Send a SSAE for an illustrated flyer and state your scale.

Important Notice to our Customers: The Building & Structure Company was sold to Banta Modelworks effective 27 September 1998. Please address all orders and inquiries to banta modelworks after that date. The previous owners, John Kalin & Pete Smith, will continue in business under the Tomalco name and will continue to manufacture their line of flex-track and turnouts. Structure kits previously produced in S scale under license from American Model Builders will be discontinued when inventories are sold out.

TO ORDER

Try our dealers or order direct from us. We normally use UPS, so give us a street address rather than a box number.

As a matter of policy we do not back order. You will receive a check with your order for the value of the merchandise that was out of stock.

Orders over \$100 are shipped postpaid. Please add \$4.50 shipping & handling (\$5.50 Canada) to all orders under \$100. Other international orders will be billed actual cost for shipping.

If you are only ordering flat items, such as; Right of Way Signs, Crossbucks, Wire Screen, Buildings in a Bag, or a few parts packages, add \$1.50 S & H (\$2.50 Canada).

Vermont residents please add appropriate sales tax.

S Scale Structure Kits

The Laser Does the Hard Work™

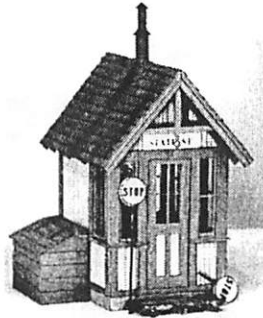

Dallas Divide Bunk House
Kit #4026L \$28.95

This small board and batten building sits on a stone foundation of cast plaster. Could also be used as a bunk house for a lumber or mining camp. (Footprint: a scale 14' x 22')

The Outhouse Collection
Kit #4021L \$15.95

In the early days of steam, these little structures were found behind every residence, business, and public place. Many have survived and remain a part of the rural scene. Two of each per kit.

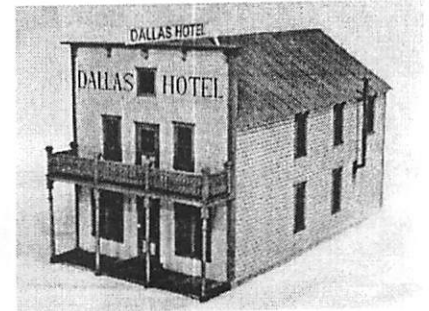

Crossing Shanty
Kit #4065L \$23.95

These structures provided shelter for crossing guards who either lower the crossing gates by hand or with pneumatic pumps. The kit consists of laser cut plywood and Basswood. The wooden trim pieces and the paper shingles have a peel & stick backing for glue-free assembly. Window glazing is cut to size. Assembles in a couple of evenings. This is an elegant model that is loaded with detail. Signs not included. (Footprint: a scale 9' x 9' including tool box and front deck)

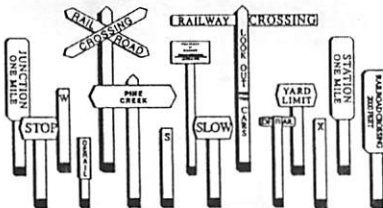

Dallas Divide Section House
Kit #4025L \$44.95

Lots of nice angles on this building. It would also make a nice farm house. All laser cut wood to include windows and doors. The foundation is a plaster casting. There is an additional door to the right as you mount the front steps that is not pictured on the pilot model. (Footprint: a scale 32 1/2' x 29')

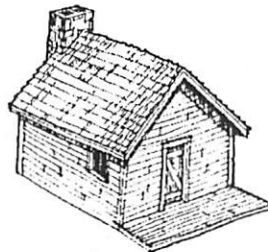

Dallas Hotel
Kit #4019L \$69.95

The most unique feature of the building is the scroll cut balustrade—meticulously rendered by the laser. Features laser cut interlocking wall and roof parts; crack & peel tar-paper roofing that is cut to width; glue-free assembly of doors, windows and building trim; decals for several different hotel names. (The footprint is a scale 24' x 46').

Right-of-Way Signs
Kit #4030L \$13.95

The sign boards are laser cut from 1/64" plywood. Each kit contains sign boards, decals, sign posts and detailed instructions on how to build and locate 62 signs. Nicely executed! An often overlooked trackside detail. Just want crossbucks? Order Kit #6031L. A package of 11 crossbucks for just \$7.95

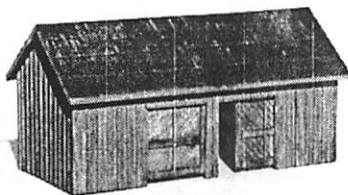

Miner's Cabin
Kit #4078R \$23.95

The kit consists of cast urethane walls, roof and front deck and a cast Hydrocal chimney. Can be assembled in a single evening. (Footprint: a scale 12' x 24')

Dallas Divide Tool House & Coal Shed
Kit #4028L \$28.95

The kit contains both buildings. The coal shed has a large trap door on the rear roof. It backed up to the track and coal was hand shoveled from a gondola into the building. (footprints: a scale 18 1/2' x 12' and 9' x 12')

Dallas Divide Handcar Shed
Kit #4027L \$18.95
(footprint: a scale 28' x 12')

To Order: At your dealer or order direct from us. Add \$4.50 S&H to all orders under \$100. If you are just ordering kit #s 4024L, 4030L, 4031L, or 4050L, add \$1.50 S&H. Missouri residents please add appropriate sales tax. We accept checks, VISA, or Master Card.

S Scale Cast Hydrocal Structure Kits

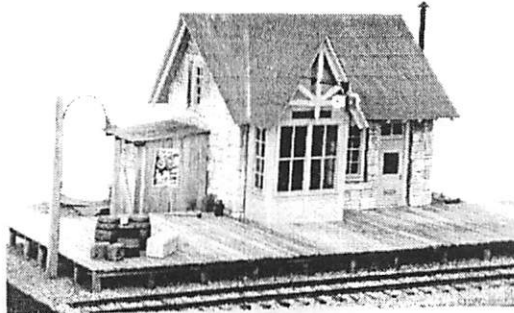

A Small Sampling From Our Line of Cast Plaster Structures

The Siedel Welding Shop

Kit #4000 \$29.95

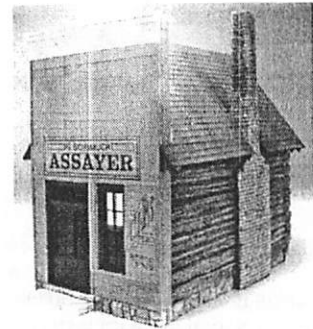

Features a corrugated metal roof, white metal stove pipe and Grandt Line door and window castings. Includes decals for sign. (Footprint: 3" x 4 1/2")

Branch Line Station

Kit #4040 \$68.95

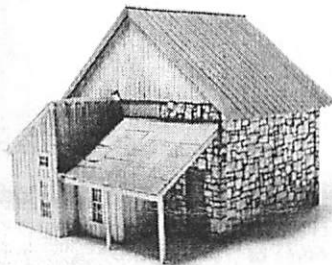

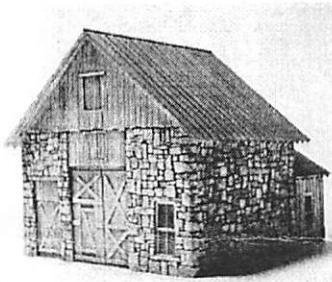

This small depot is loaded with charm. Cast walls, Grandt Line doors, windows and station order board. Roof is styrene covered with tarpaper. Includes station signs, bench and wood for the platform. (Building footprint 3 3/4" x 4 3/4", total footprint to include the platform 6 1/2" x 11 3/4")

Assayer's Office

Kit #4008 \$31.95

Features a molded styrene roof, clapboard front, log walls, brick chimney, and Grandt Line door and window castings. Includes decals for sign. (Footprint: 3" x 4 1/2")

The Stone Barn

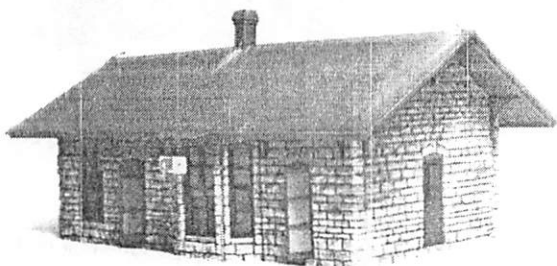

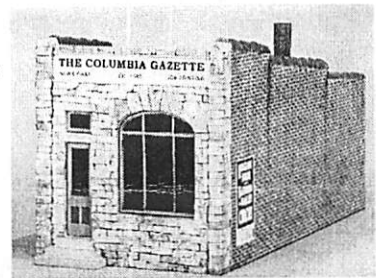

Kit #4074 \$68.95

Created by the noted model builder, Roger Malinowski. This will be a limited run kit; not to be repeated. The kit features cast Hydrocal™ walls, an Evergreen, standing seam styrene roof, laser cut windows, glazing and rear room additions. Footprint: 5 1/2" x 4 3/4" inches.

The Columbia Gazette

Kit #4067 \$49.95

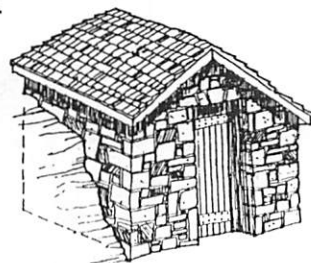

The brick and stone walls are Hydrocal™ castings. The windows, doors and roof are laser cut plywood. Window glazing is cut to the precise size and shape required. Includes peel & stick tar paper roofing material, white metal detail parts and sufficient decals for a variety of business names. The foot print is 3" x 6 1/2".

Gunnison Depot

Kit #4015L \$54.95

Built in 1882 by the South Park, it served five different railroads. Features a PBL roof and a wealth of white metal detail parts. Roger Malinowski did the stone work. (Footprint: 3 3/4" x 7")

Dynamite Shack

Kit #4077 \$13.95

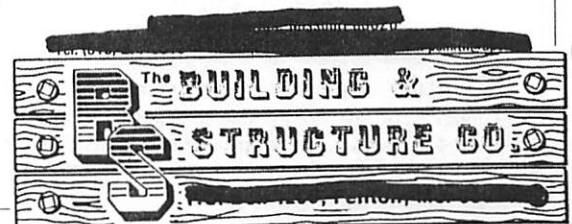

The building is a one piece Hydrocal™ casting and the roof is cast Urethane. Looks good as a free standing building or even better partially buried on the side of a hill.

Soda Springs Station

Kit #4022 \$42.95

This small freelance station is just the ticket for a limited space situation. PBL molded roof and lots of white metal detail parts such as benches are included. (Footprint: 2 7/8" x 4 1/2")

The kits pictured on this page are only available in S scale

S Scale Structure Kits

The Laser Does the Hard Work

Interlocking Tower

Kit #4035L \$49.95

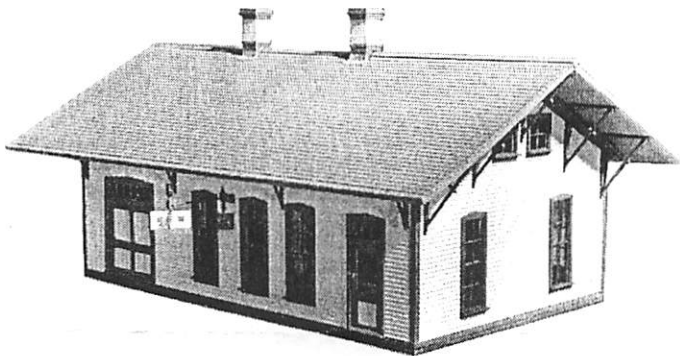

This structure is a composite of design elements common to interlocking towers on several major railroads. All major components are laser cut Basswood. The windows, doors and staircase components are laser cut birch plywood. The double hung windows can be modeled in an open position. All window glazing is precut to size. (Footprint: 3 1/2" x 4")

Lake Junction Station

Kit #4034L \$45.95

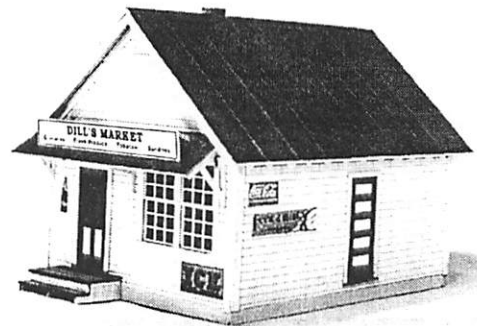

Lots of fancy victorian trim on this classic little station. All laser cut wood of course. Shingles are laser cut peel and stick paper. (Footprint: 2 3/4" x 3")

Cumbres Station

Kit #4033L \$89.95

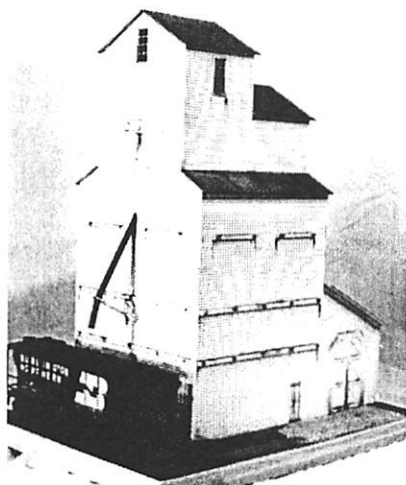

The model is an accurate replica of the D&RGW prototype. All laser cut wood. Includes interior wall partitions, laser cut shingles, white metal chimneys, and a Grandt Line station order board. (Footprint: 4 1/2" x 7 1/4")

Dill's Market

Kit #4060L \$32.95

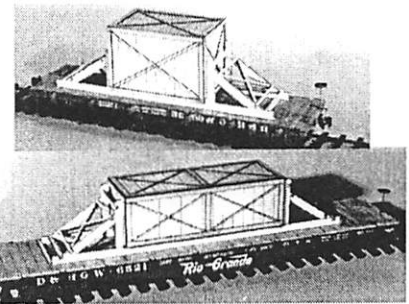

A typical rural market. All wood construction, peel and stick tarpaper roofing and white metal chimney. We even include a selection of commercial signs. Reserve about two evenings for assembly. (Footprint: 3 1/2" x 4 1/2")

Country Grain Elevator

Kit #4023L \$69.95

This imposing structure is a composite design typical of elevators constructed in the early 1900s. The kit is entirely laser cut styrene. The window and door castings are by Grandt Line. (Footprint: a scale 31' x 49'3", the height is 70')

Flat Car Loads

Kit #4038L (top), #4037L (bottom) \$11.95

Although they were designed for Sn3, they work well on S standard gauge flatcars as well. All laser cut wood with peel & stick backing for glue-free assembly. They assemble in less than 30 minutes and require no paint. Kit #4038 is 24ft. long and Kit #4037 is 30ft. long.

The kits pictured on this page were designed by American Model Builders, Inc., and they are produced in S scale with AMB's permission. These kits are available in HO scale from AMB.
