

S-Gauge Flex-Track

- Easily bends to virtually any shape without kinking
- No templates, bend fixtures or special tools required
- Highly conductive and durable nickel silver rails
- Exclusive double rail joiner eliminates unsightly gaps
- Manufactured in full 40-inch sections, choice of finishes
- Special adapters mate solid .172" rail to AF switches

NEW!

Patent
Pending

Corona Flex offers the solution to S-gauge model railroaders needs with the introduction of new (patent pending) .172 solid-rail flex track. It can easily be formed to any desired shape without the use of special tools or fixtures, with nail holes in the ties (spaced about every 4 inches) to facilitate attachment. The rails won't kink (like tubular versions do when bent), and are firmly attached to the ties. These ties won't snap or break off when put through repeated bendings.

Lay down Corona Flex tracks in most any shape, with radii as tight as 10" if you desire (although we recommend a minimum radius of 20" for proper rolling stock stability). Each section of track is a full 40" long to accommodate most popular design templates.

The solid nickel silver rails are corrosion resistant and require little maintenance (unlike brass rails, which must be constantly cleaned). You have a choice of weathered (darkened) or unweathered trails, with wood grain finish ties.

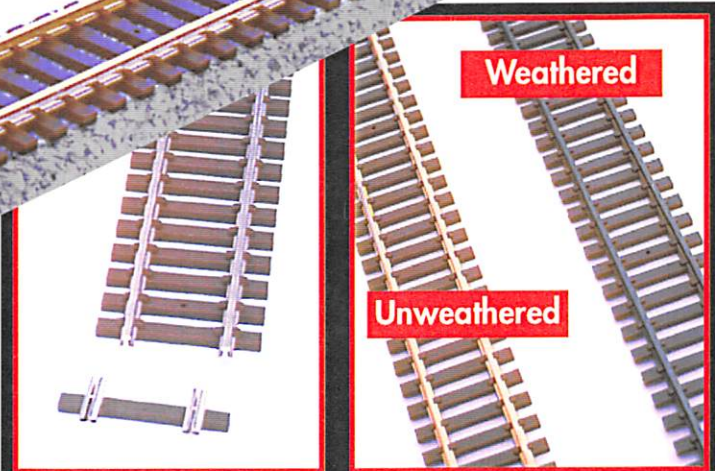

CORONA FLEX

Manufacturers of quality hobby products.

P.O. Box 1867, Corona, CA 91718

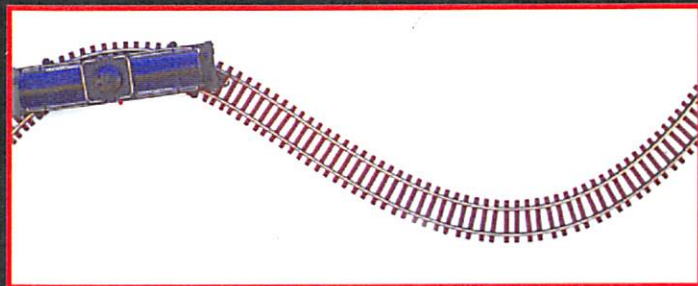

909-735-3417

Dealer inquiries invited.

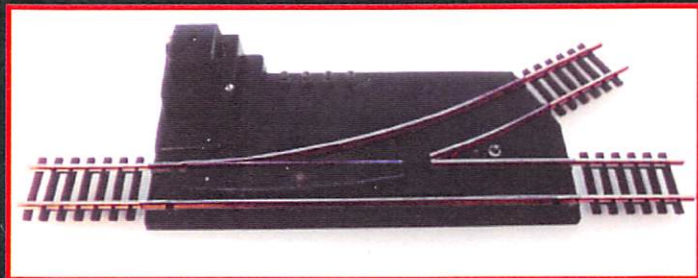

Our unique double rail joiner system allows even tie spacing without gaps. Other systems require you to add an extra tie. This is truly the "hot setup"

S-Gauge Flex Track is available in weathered (darkened) or standard unweathered styles. Simulated wood grain ties come with both color tracks.

Go ahead...bend the track to virtually any desired shape. it can handle radii as tight as 10" (although a 20" minimum is recommended for train stability).

Special switch adapters will match Corona Flex .172" solid rail to any AF switch. Each switch adapter is 2-1/2" long and comes in packages of three.

"S-Gauge Flex-Roadbed"

by Corona Flex

- Realistic 'Rock' appearance
- Gives the appearance of 'ballasted' track
- Made of true rubber
- Won't crack or deteriorate
- Completely flexible
- Available in various colors
- Easily cut
- Offers the ultimate in sound deadening
- Easily glued to your board

Corona Flex offers the solution to S-gauge model railroaders need for realistic "rubber" roadbed. This roadbed will not crack or deteriorate like cork. Completely flexible to conform to your layout. This roadbed is the ultimate in quality, appearance, durability and realism. Tough enough to be handled, curved and yet soft enough to add the ultimate in sound deadening. Can be easily glued to your board and track is then nailed down. Eliminates the need to "ballast". This is the easiest, quickest method to get the realistic prototype look. This roadbed can easily cut, curved or sectioned to fit your needs. Available in many colors to fit your scene and scheme.

HO- 3/16" thick

S- 1/4" thick

O- 1/4" thick

'Corona Flex' Switch offer

Corona Flex Switches for 'S' Gauge.

Deposits are now being accepted for #6 S gauge code .172 solid Nickel Silver manual, left and right hand switches. Electric switch machine can be added. In order to help with tooling costs, Corona Flex is offering a promo deposit price of \$75 for a pair of switches (L&R). One pair minimum order, normally \$49.95 each, includes free shipping to continental US.

Switches will be accurately scaled with spaced ties to look like US prototype and conform to Corona's flex track.

Can be used with table top or under table switch machines or manual ground throws. Made in USA.

All money accepted will be placed in a 'Corona Flex Trust' account until promo ends Dec 31 1996. If 500 orders are received during the promo, then switches will be made and shipped approx. July 1997. If orders for 500 pairs are not received then all deposits will be sent back by Jan 31 1997.

Send Deposits to:

**Corona Flex
PO Box 1867
Corona, Ca 91718
(909) 735-3417**

Make checks payable to 'Corona Flex Trust'.

Please indicate number of pairs ordered.
