MDC

Sn3 and Sn2 SHAY CONVERSION

The MDC SHAY is the perfect conversion kit. The gauge change to Sn3 requires only pushing the wheels in on the axles and trimming the pin bosses from the truck frame with a knife. The wheels (24") and the truck wheel base (46") are both dead-on for 10 ton to 24 ton SHAYS. The HO SHAY kit can also be converted to Sn2, MDC will soon have the kit in HO n3 and this will make Sn2 even easier.

CAN MOTOR

The motor supplied with the MDC kit fills the gangway and cab. It just cannot be hidden. We recommend replacing it with a can motor. Kit # S-18 requires replacement with a 16x25mm can motor. All other kits can use a larger motor. A 18x25mm or 18x30mm will fit within the fuel bunker. A 18x36 flat can will work if the top of the bunker is cut out and the top of the motor is covered with the fuel.

S-15 CAB, BOLSTER EXTENSIONS, END BEAMS AND FOOT BOARDS, FIRE BOX, BACK HEAD, CAB FITTINGS, 2 STACKS, 2 HEADLIGHTS, BELL, AIRPUMP, GENERATOR,

S-16 ALL OF THE ABOVE, PLUS BOILER, CYLINDERS, DOME.

S-17 " " " " " " " " DOMES.

S-18 " " " " " " " " DOME, WATER AND OIL BUNKER. MUST USE 16X20 mm can motor.

S-19 ALL OF THE ABOVE, PLUS BOILER, DOMES.

BOILERS AND ALL FITTINGS ARE CAST IN WHITE METAL.
