Model Barn Replicas

Very authentic detail in these duplications of a clear-span metal building. Gives your train layout the modern rural look you've been searching for. So authentic in detail, once assembled, it's hard to tell they are not metal.

Printed on artist's board in four different colors, and available in three different styles. The kit is two pieces, so easy to assemble. The roof is one piece, the floor and side walls are the second piece. Use any white glue and fold up like a box.
